PROFESSIONAL SUMMARY

AI student with hands-on experience in Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, and Data Analysis. Skilled in building end-to-end projects and deploying them on external servers for public use. Proficient in Python and modern AI tools

EDUCATION

Mobica International Applied Technology School

Expected Graduation: 2028

Secondary School — Specialization: Artificial Intelligence

- Studying a specialized AI curriculum covering machine learning, deep learning, and data science • Applied theoretical knowledge through multiple hands-on AI and ML projects

PROJECTS

Sugrly — AI-Powered Diabetic Assistant

AI-powered healthcare app for diabetic patients. Built the backend and AI pipeline to support blood glucose tracking, meal analysis, and voice-based medical guidance.

- Role: Backend Developer & AI Engineer
- Designed and built the FastAPI backend with JWT auth, PostgreSQL/SQLite databases, and full REST API documentation
- Integrated Google Gemini Vision for AI meal analysis and Whisper for voice-to-text medical guidance
- Stack: Python, FastAPI, PostgreSQL, SQLite, Whisper, Google Gemini, JWT

AI Lecture Summarizer

End-to-end AI system that transcribes lecture audio and generates concise text summaries. Built as the sole developer handling both backend logic and AI model integration.

- Role: Backend Developer & AI Engineer
- Integrated Whisper for audio transcription and T5 transformer for abstractive summarization
- Stack: Python · Whisper · T5 · Hugging Face · Streamlit

TECHNICAL SKILLS

AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision (YOLO), NLP

Models & Frameworks: Whisper (OpenAI), T5 (Hugging Face), PyTorch, Scikit-learn, Pandas, NumPy

Databases: SQL, PostgreSQL, MongoDB, SSMS (SQL Server Management Studio)

Deployment & APIs: FastAPI, REST APIs, Streamlit, Model Deployment

Frontend: React, HTML, CSS, JavaScript

Tools & Platforms: Python, Git, GitHub, Hugging Face, Jupyter Notebook, Excel, Power BI, SSMS, VS Code

COURSES & CERTIFICATIONS

- Machine Learning — Self-paced, YouTube (Andrew Ng curriculum)
- Deep Learning — Self-paced, YouTube (deep neural networks, CNNs, RNNs)
- AI Model Integration — iSchool (FastAPI, REST API deployment)
- Data Analysis — TARA Course (Excel, Power BI, SQL, SSMS, Pandas, NumPy, data visualization)
- BCG X GenAI Simulation — Forage
- Languages: English (Intermediate)
